

PB 14060002 - Fittings for Tama and Que compressors

What it is about ?

To ease the routing of the refrigeration hoses in the engine compartment, OlivaTorras developed a new set of fittings to be coupled with Tama/Valeo OR Que compressors.

The first 3 sets : 1170000001 -1170000002 . 1170000094 are monoblock versions with vertical connectors- horizontal connectors or vertical(suction) and horizontal (discharge) connectors.

All those connectors have been modified to fit the Que compressors and remain with a second O-Ring for better security from any refrigerant leak.

Four new sets have been added to add flexibility while installing compressors in a more and more challenging engine compartment space: 1170000020 . 1170000030 . 1170000040 . 1170000050 (See fittings direction in drawing attached)

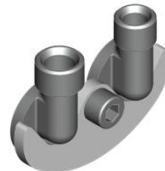

When ?

All those new components are available, effective now.

Where ?

Price list is available in OlivaTorras web site

PB 14060002 - Fittings for Tama and Que compressors

Part number	Suction	Discharge	Image
1170000001	Vertical 7/8-14UNF	Vertical 3/4-16UNF	
1170000004	Straight 7/8-14UNF	Straight 3/4-16UNF	
1170000094	Horizontal 7/8-14UNF	Vertical 3/4-16UNF	

PB 14060002 - Fittings for Tama and Que compressors

Part number	Suction	Discharge	Image
1170000020	Straight 7/8-14UNF	Vertical 3/4-16UNF	
1170000030	Vertical 7/8-14UNF	Straight 3/4-16UNF
