IVECO DAILY 2.3 – Hi-Matic tubes

This Service Bulletin only applies to vehicles manufactured between October 2021 and 28th February 2022

Problem:

Iveco launched the vehicles with the different Hi-Matic tubes, and consequently our kit installation was impacted.

Solution:

Iveco will rework all these vehicles; in case they have to be transformed to Frigo.

If you receive any of these vehicles, **you have to bring them to your closer Iveco Dealer,** and they will take the **modification of the Hi-Matic tubes in warranty.**

After that, you will be able to install our **KC18070465E,** without problems.
